November 28, 2016

I am pleased to recommend Simon Greener, Owner of Greener Productions Pty Ltd, also trading as The SpatialDB Advisor, whom we have retained to assist us in filling a key position in our progress to spatial organize our company business data.

We consulted with Simon last year to analyze our data and create a spatial search function for our product iproplologic.com. Simon invested the time to look into the solution upon our request. Furthermore, he took the initiative to analyze our spatial database, document several issues, provide us with his concerns and advise, and submitted his thoughts for direction. His comprehensive knowledge of Oracle and GIS solutions are above reproach. Simon is a good communicator and will keep you informed through the life cycles of your project. It would be a mistake not to hire Simon and take his advice when database consulting is needed for your products.

Sincerely,

A handwritten signature in blue ink, appearing to read "Chris Mask".
